

# The Modern Learning Management System

It's simpler than ever to deliver impactful learn-by-doing experiences, thanks to our new Learning Management System (LMS). Learn I.O. offers greater self-service functionality for both client administrators *and* learners through a user-centric online interface.

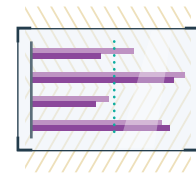

## USER-FIRST DESIGN

An intuitive interface streamlines common LMS tasks, so it's easier than ever to deliver training to learners anywhere in your organization.

## SECURE SYSTEM

Your data is safe with multi-level user permissions, SAML 2.0 Single Sign On, TLS 1.2 encryption for data in transit, and our SSAE-16 Type II compliant data center.

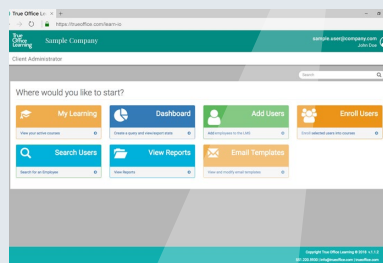

## CUSTOM REPORTING

Track and monitor enrollment, login, progress, completions, and history – all available as downloadable reports or live in your interactive dashboard.

## Dual Modes

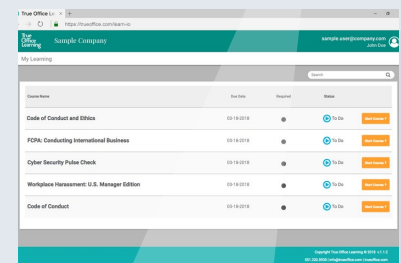

### Self-Administration

Manage user roles, enroll learners individually or by group, send templated bulk emails, and (quickly!) launch courses.

### My Learning

Learners have direct access to their current training and history, with minimal navigation or bookmarking and clear course status/deadlines.
